

# Float & Thermostatic Steam Traps

Model  
PT

## DOUBLE INLET / DOUBLE OUTLET F & T TRAPS

The PT Series is a group of float & thermostatic traps for use in the discharging of air and condensate, while preventing steam from entering return piping on steam heating systems and steam process equipment. These traps can be piped in and out from either side, providing installation flexibility. Four models are available to meet a variety of pressure requirements.

- **Responsive thermostatic action:** disc design reduces hinge action to evenly distribute disc motion for enhanced sensitivity to pressure and temperature conditions
- **Instantaneous valve action** – highly engineered positioning of flat valve responds rapidly to prevent steam from entering piping
- **Continuous condensate discharge** – float-operated discharge valve opens wide to continuously drain condensate
- **Easy in-line inspection and repair** – all working parts can be inspected, removed, repaired or replaced without disturbing the piping. Removable flush plug on the bottom of the trap permits easy cleaning

## ORDERING SCHEMATIC

MODEL		2	3	4	5
P	T	0	1	5	3

2	3	4	MAXIMUM ALLOWABLE DP
0	1	5	15 psid
0	3	0	30 psid

**DOUBLE INLET / DOUBLE OUTLET F & T TRAPS**
**SPECIFICATIONS**

Maximum Differential Pressure:

Model PT015 – 15 psig (1,03 bar)

Model PT030 – 30 psig (2,07 bar)

Model PT075 – 75 psig (5,17 bar)

Model PT125 – 125 psig (8,62 bar)

Line Sizes: 3/4", 1", 1-1/4", 1-1/2", 2"

End Connections: Threaded (FNPT); flanged

Maximum Operating Pressure: 250 psig (17,2 bar)

Maximum Body Temperature: 400°F (204°C)

**MATERIALS**

Body &amp; Cap: Cast Iron

Thermostatic Disc: Stainless Steel

Valve &amp; Seat: Stainless Steel

Float &amp; Lever: Stainless Steel

Gasket: Non-asbestos fiber

Note: capacities are continuous discharge capacities in pounds of condensate per hour (kg/hr shown in ( )) at pressure differential indicated, determined by tests conducted according to ASME Performance Test Code 39.1-1980. Apply safety factor as required per application. Condensate within 5°F (-15°C) of steam temperature.
